

CAMPUS ROSKILDE

With the new Campus Roskilde, University College Sealand consolidates its professional bachelor's programmes covering social education and social work, health and teaching.

The new campus will facilitate dialogue and random meetings and provide the students with a feeling of being part of a manifold university environment beating with one pulse.

Campus Roskilde will consist of four square buildings – slightly rotated towards each other to screen the area from the motorway and create a more intimate, varied space around the campus square. In this way, a new meeting place is created between the urban quarter of Trekroner and the green areas around Roskilde University. Under the overhang of the main building, a roofed square will open up to the rest of the campus area and create life and a sense of community among the students.

Campus Roskilde is characterised by a significant green profile where the displaced buildings will help to optimise the energy consumption and make the campus adaptable to possible extensions in the future.

The building covers 20,000 m² in total of which the first 14,000 m² will be inaugurated in 2012.

Location	Roskilde, Denmark
Client	University College Sealand
Gross floor area	20,000 m ²
Year of construction	2010 - 2012
Type of assignment	First prize in international competition
Collaborators	Enemærke & Pedersen, Cowi and Thing & Wainø Landscape Architects
